INTRODUCTION

Quodin Ghraefx is a Ghanaian Software company based in Obuasi, Ashanti Region, Ghana. It was founded in 2015 with the goal of solving the loopholes in the manual system while maximizing profit of business owners. We started by developing *electronic ticketing system* to curb the corruption of fake tickets, which, at the time was a very common challenge in Ghana.

We then discovered through research that there were many gaps in the system of which we had the expertise to do much more to remedy those situations. So, with research we started developing systems such as:

- School Management system
- Time and Attendance system
- Inventory management system
- Banking system
- Hospital information system
- E-Learning Software
- Android apps
- iOS apps
- Linux and MacOS versions of the apps developed
- Websites including Ecommerce websites

MILESTONE

We have also developed a social media App, which, when fully funded, shall be rolled out to the general public. This, however, will enable us scale our business, thereby opening branches in other places so as to help accommodate and engage the services of more talented people to help us scale, overall. It has, granted, the App, numerous functionalities including but not limited to:

- Filtering institution by their region, categories.
- Registering new institution to reach out to customers like no other.
- Chatting options include hiding contents from only the other party that can still show in yours or only hiding it from your chat page or both.
- Set current country and locations to get emergency services near you like Ambulance, Fire and Police service. (This could help Ghanaians because there is not such a system like that, even the Government intervention is bureaucratic, which passes through a lot of uncoordinated service center).
Etc.

GOALS

The change that the technological world is adapting is accelerating, so we have started an initiative where we seek to convert websites to Android and iOS versions to eradicate the laborious effort of typing every single letter of websites before visiting the said website. That, of course is not the end goal; our work-in-progress projects include the following:

- Banking App
- Hospital App
- Hotel booking App
- Voting App
- Ticketing and reservation App
- Ecommerce App
- Cinema/ Video streaming App
- Money Remittance App

We also want to help the locals who are less educated to embrace Technology, so to speak, in a much simpler way so as to help them accept and benefit from technology.

CLIENTELLE

Some of our clients include the following but are not limited:

- Muffin Group, Ghana
- POMS Enterprise, Ghana
- Oduro Motors, Ghana
- Bendah Home of Beauty, Texas, US
- Adehye Services, Pennsylvania, US
- Lorac Couture, Ghana
- IB Fashion, Ghana
- Camp Martin, Ghana
- Winterfell School
- Chris EnB Engineering Services Ltd.

We have a collaboration with Chris EnB Engineering Service Ltd, a contractor with mining companies in Ghana. They hire us to develop software and Apps as and when they are contracted with Tech projects.

VISION STATEMENT

To become one of the leading and most reliable software firms in developing, deploying and upgrading services rendered to our customers in a cost effective manner.

MISSION STATEMENT

Guided by our vision, we deliver high-quality, cost-effective projects on schedule to enhance our client's satisfaction through continuous improvement of our business practices.
